## PERSONAL BIO

---

A dedicated Full Stack Developer with expertise in frontend, backend, database management, and deployment. Originally trained in Astrophysics, I bring analytical problem-solving and a passion for continuous learning into software engineering. Experienced in building and deploying enterprise-grade applications using technologies such as NestJS, FastAPI, React, Angular, Svelte, MongoDB, PostgreSQL, Twilio, and Deepgram. Focused on scalability, performance, and user-centric design, I thrive on delivering robust, high-quality digital products.

## EDUCATION

---

**University of Cambridge** MSci / BA Astrophysics

*Sep 2019 - Jun 2023*

Achieved grade: Upper Second-Class

- Conducted computational astrophysics research using **Python** and **C++**, including simulating particle dynamics and collision behavior in astrophysical systems such as Beta Pictoris' debris disk.

**Newham Collegiate Sixth Form Centre**

*Sep 2017 - Jul 2019*

A levels: Mathematics (A\*), Further Mathematics (A\*), Physics (A\*) and Chemistry (A\*)

AEA: Maths (Distinction)

## PROFESSIONAL EXPERIENCE

---

**Jaid**

London / Hybrid

*Full Stack Developer*

*Dec 2025 – Present*

- Maintain and extend a production application built with **NestJS**, **Node.js**, **MongoDB**, **Angular**, and **Svelte**.
- Work across several smaller interconnected applications within the wider system, resolving bugs, shipping incremental features, and ensuring stability across services.
- Collaborate closely with the team to prioritize and deliver maintenance work while keeping the platform reliable for end users.

**Firewood Ltd**

London / Hybrid

*Full Stack Developer*

*Jun 2024 – Nov 2025*

- Contributed to an enterprise-grade project assurance platform called **FAST**, featuring a **Ruby on Rails** backend and a frontend built with **HTML**, **CSS**, and **JavaScript**, deployed securely on **AWS**.
- Designed and developed **Resonate**, an AI-driven voice-driven reporting application built from scratch using **FastAPI**, **React**, and **PostgreSQL**, integrating **Twilio** for voice automation and **Deepgram** for transcription.
- Built **Lumina**, a data analytics platform for capability assessments that processed survey data into interactive graphs, developed with a **TypeScript-based Express.js** backend, a **React** frontend, and a **PostgreSQL** database.
- Managed end-to-end deployment pipelines, integrated **AWS Bedrock** for AI-driven functionality, and collaborated with cross-functional teams to enhance usability, performance, and scalability.

## CERTIFICATIONS & TECHNICAL TRAINING

---

**AWS Certified Cloud Practitioner**

*Feb 2024*

- Gained a strong understanding of core AWS services, cloud architecture principles, and cost optimization.

**TOGAF Enterprise Architecture Foundation & Practitioner Certified**

*Jan 2025*

- Achieved globally recognized certification in the **Open Group Architecture Framework (TOGAF)**, covering both foundational and advanced levels.

**Technical Skills**

- **Proficient:** NestJS, FastAPI, React, Angular, Svelte, MongoDB, PostgreSQL, Ruby on Rails, TypeScript, Express.js, JavaScript, AWS.
- **Intermediate:** Python, Java, HTML, CSS, MATLAB
